

SI	FHIR Field	OpenEMR Table.Field	OpenEMR ID	OpenEMR Title	Fhir Code	FHIR System	Display	Definition
1	status	procedure_report.report_status	final	Final	Final	http://hl7.org/fhir/R4/valueset-observation-status.html	Final	The existence of the observation is registered, but there is no result yet available.
			prelim	Preliminary	preliminary	http://hl7.org/fhir/R4/valueset-observation-status.html	Preliminary	This is an initial or interim observation: data may be incomplete or unverified.
			cancel	Canceled	cancelled	http://hl7.org/fhir/R4/valueset-observation-status.html	Cancelled	The observation is unavailable because the measurement was not started or not completed (also sometimes called "aborted").
			error	Error	entered-in-error	http://hl7.org/fhir/R4/valueset-observation-status.html	Entered in Error	The observation has been withdrawn following previous final release. This electronic record should never have existed, though it is possible that real-world decisions were based on it. (If real-world activity has occurred, the status should be "cancelled" rather than "entered-in-error".).
			correct	Corrected	corrected	http://hl7.org/fhir/R4/valueset-observation-status.html	Corrected	Subsequent to being Final, the observation has been modified to correct an error in the test result.
			review	Reviewed	Final	http://hl7.org/fhir/R4/valueset-observation-status.html	Final	The existence of the observation is registered, but there is no result yet available.
					registered	http://hl7.org/fhir/R4/valueset-observation-status.html	Registered	The existence of the observation is registered, but there is no result yet available.
					amended	http://hl7.org/fhir/R4/valueset-observation-status.html	Amended	Subsequent to being Final, the observation has been modified subsequent. This includes updates/new information and corrections.
					unknown	http://hl7.org/fhir/R4/valueset-observation-status.html	Unknown	The authoring/source system does not know which of the status values currently applies for this observation. Note: This concept is not to be used for "other" - one of the listed statuses is presumed to apply, but the authoring/source system does not know which.
